

# SUSTAINABLE CITIES: WHY THEY MATTER

## Urbanization

The world's population is growing rapidly, and more people are moving to cities. This is leading to a significant increase in urbanization.

## Urbanization

The world is becoming more urbanized. Since 2007, the world's population has grown by half a billion people, and this growth is expected to continue. By 2030, the world's population is projected to reach 8 billion.

Urbanization is a major driver of economic growth and innovation. It is also a major source of environmental challenges, such as air pollution and climate change.

Urbanization is a major driver of economic growth and innovation. It is also a major source of environmental challenges, such as air pollution and climate change.
